

# Animals and the environment

*We would like to acknowledge Community Child Care Co-operative (NSW) for material used in this policy*

## Policy Statement

Educators are “encouraged to foster children’s capacity to understand and respect the natural environment and the interdependence between people, plants, animals and the land.” (NQS element 3.2)

Responsible ownership of pets, animals or birds that may reside at North Rocks Preschool or visit the premises is vital. Role models of appropriate behaviours with animals and guidance in caring for the needs of animals is beneficial for children. This policy also considers the management of unwanted visitors such as pests and vermin.

## Goals / what are we going to do

North Rocks Preschool will:

- Provide a safe, clean and humane environment for all animals and birds that visit or reside at the service.
- Ensure that the health and wellbeing of children is being maintained when engaging with animals.
- Ensure pest control measures are regularly undertaken; and
- Ensure there are procedures in place for removing unwanted animals, pests and vermin from the premises.

**NORTH ROCKS**  
PRE-SCHOOL

A young child with light brown hair is shown in profile, looking towards the right. In the background, a goldfish is visible in an aquarium, swimming near some green and yellow decorations. The title 'Animals and the environment' is overlaid in white text on the image.

# Animals and the environment

## **Strategies / How will it be done**

### **Centre Pets and Invited Visitors**

- Educators will ensure that all pets and their enclosures are kept clean and hygienic.
- Educators must ensure they have clean bedding and water. Food is available for the pet, but kept out of reach of children at all times.
- Children must be supervised at all times when interacting with pets or animals. Educators will manage any health or safety risk for the children that may be caused by animals, such as asthma and allergies.
- Pets will not have access to children's bedding, toys, food preparation areas, eating surfaces or utensils.
- Animals and birds visiting North Rocks Preschool as part of the educational program are the responsibility of the owner(s). The educators will ensure that the environment remains safe and hygienic at all times during the visit. Educators will complete risk assessment paperwork in relation to the visit.

### **Animals and Birds Other than Pets or Invited Visitors**

- There are situations that may spontaneously occur, involving animals. For example, there may be a situation where an animal or bird has made its way into the preschool. Educators may use this as a spontaneous learning experience for the children. At all times they will ensure the safety and wellbeing of the children.
- If an animal or bird is potentially dangerous; such as a snake or spider, educators will contact an appropriate authority for assistance. In NSW this authority is the National Parks and Wildlife Service - **1300 361 967** (8.30am - 5.00pm) or NSW Wildlife Information, Rescue and Education Service Inc on **13 000 WIRES - 13 00 094 737**.
- The animal's movements should be monitored to ensure a speedy and efficient capture by a professional, but priority is to be given to educator, child and family safety. At no time is the potentially dangerous animal, insect or bird to be approached or touched by educators, children or families.

# Animals and the environment

## **Pests and Vermin**

- **Pest control will occur at North Rocks Preschool on a termly basis. Educators will monitor any occurrences in the service to determine the success of control measures.**
- **If pests and vermin are seen, educators will advise the nominated supervisor. The approved provider is responsible for arranging additional pest control visits.**
- **Where appropriate, educators discuss with children safety issues relating to dangerous products, plants, vermin and objects.**
- **Educators will thoroughly clean all areas that animals or pests have accessed in the education and care service with hot, soapy water. If the remains of an animal or animal faeces have been found, the remains will be disposed of according to the local Council guidelines and the area where the remains were found will be thoroughly disinfected with hot, soapy water.**
- **Educators will be responsible for assessing any situation in the education and care service where animals are involved to ensure the health, safety and wellbeing of children, families and animals.**

## **Evaluation**

**The presence of animals at North Rocks Preschool will be managed by educators to ensure that the safety and wellbeing of children, families, educators and animals is maintained at all times. Educators will consider the risks versus the benefits of including animals in the educational program.**

A photograph of a stick insect (Phasmatodea) perched on a weathered, greyish-brown branch. The insect is long and thin, with a brown body and greenish-yellow legs, blending perfectly with the branch. The background is a soft, out-of-focus green.
