

Supervision

We would like to acknowledge Community Child Care Co-operative (NSW) for material used in this policy

Introduction

Children must be adequately supervised at all times that they are being educated and cared for both at the preschool and on excursions. Supervision can prevent and reduce accidents through early detection of potential hazards and an awareness of the children, and their activities. At North Rocks Preschool we must prioritise regular assessment of their supervision practises in order to increase educator's awareness of their duty of care and to continuously improve supervision procedures.

Goals / what are we going to do

At North Rocks Preschool we pride ourselves on maintaining a safe and secure environment where children are free to explore and learn about their world. The Nominated Supervisor and educators are familiar with regulatory requirements and standards regarding supervision. At North Rocks Preschool we encourage educators to evaluate their supervisory practices and implement plans that increase their awareness of the layout, risk management and supervisory choices within the preschool environment.

Strategies / How will it be done

The Nominate Supervisor will:

- Ensure that the premises are designed and maintained to facilitate supervision of children at all times while considering the need to maintain the rights and dignity of all children

NORTH ROCKS
PRE-SCHOOL

- Ensure that the age and supervision requirements for educators are maintained at all times. Any educators who are under eighteen years of age may work at North Rocks Preschool, provided they do not work alone and are adequately supervised at all times by an educator who is over eighteen years of age.
- Notify the regulatory authority within 24 hours if a child appears to be missing, cannot be accounted for, appears to have taken or removed from the premises, or has mistakenly been locked in or out of the education and care services premises.
- Carefully plan rosters that ensure continuity of care and adequate supervision at all times when children are being cared for and educated in the service and on excursions.
- Ensure that a risk assessment is carried out before an authorisation is sought for an excursion. The Risk assessment will consider and identify the number of adults required to ensure continuous adequate supervision throughout the excursion.

Educators will:

- Document a supervision plan and strategies for both indoor and outdoor areas. This will assist educators to position themselves effectively for supervising the children's play. They will take into consideration the layout of the premises and grounds, any higher risk activities, the presence of any animals, the location of activities and the location of bathroom facilities.
- Inform new and relief educators about supervision arrangements and what is required of them in relation to supervising children.
- Regularly review the supervision plan and strategies to evaluate the effectiveness of the plan and its implementation by educators. The supervision plan and strategies will be displayed for families in all rooms and in the outdoor area.
- Seek to ensure that two educators are present/within view when working with children with toileting/hygiene routines.
- Arrange the environment to maximise the ability of educators to supervise all areas accessible to children. Particular focus will be on gates, the fence line and doors during outdoor play times.
- Be aware of the importance of communicating with each other about their location within the environment.
- Ensure that correct child:educator ratios are maintained throughout the preschool environment. All children will be in sight or hearing of educators at all times. No child will be left alone while eating or toileting times.

A young child with brown hair, wearing a light-colored long-sleeved shirt, is sitting at a wooden table. An adult with blonde hair, wearing a purple long-sleeved shirt, is leaning over the table, looking at a book or document. The word "Supervision" is written in large, bold, purple letters across the top of the image.

Supervision

- Supervise children during rest periods. Children will be positioned and supervised according to the *Safe Sleep and Rest Times Policy*.
- Ensure that hazardous equipment, machinery, and chemicals are inaccessible to children.
- Ensure that supervision arrangements are respectful and that interactions with children are meaningful. Educators will encourage children's independence while respecting individual abilities and needs.
- Scan the environment while interacting with individuals or small groups. Educators will position themselves to maximise their view of the environment and the children's play.
- Implement consistent supervision strategies and not perform other duties while responsible for the supervision of children.

Children's safety will be the priority of all educators when supervising children.

Evaluation

Interactions with children are respectful and meaningful and challenge each child's skills and awareness of the world. Risks are assessed and managed so that the environment can be safe, educative and stimulating. Children's activity, interactions and play are planned for and monitored by educators with consistent strategies to minimise potential dangers to children.
